

## 'Perpetua' Portable Lamp

### DESIGNER

Afra & Tobia Scarpa

### MANUFACTURER

Flos

A unique portable lamp by Afra & Tobia Scarpa for Flos in 1981, the 'Perpetua' lamp was designed as modern interpretation of the torch. Its gray anodized aluminum stem leads to a single halogen bulb and reflector. This reflector disk can be positioned along the circular aluminum tracks to adjust the intensity and direction of the lighting. Aluminum on/off buttons with green and red LED indicator lights are arranged in a diamond pattern on the base. The lamp can be used continuously on the base or it can used wirelessly for approximately 15-30 minutes. A fantastic rare piece that still feels incredibly fresh.
